

Verve Therapeutics to Present at the 41st Annual J.P. Morgan Healthcare Conference

January 3, 2023

BOSTON, Jan. 03, 2023 (GLOBE NEWSWIRE) -- [Verve Therapeutics](#), a clinical-stage biotechnology company pioneering a new approach to the care of cardiovascular disease with single-course gene editing medicines, today announced that Sekar Kathiresan, M.D., co-founder and chief executive officer, will present at the 41st Annual J.P. Morgan Healthcare Conference on Monday, January 9, 2023 at 4:30 p.m. PT in San Francisco.

A live webcast will be available in the investor section of the company's website at www.vervetx.com. The webcast will be archived for 30 days following the presentation.

About Verve Therapeutics

Verve Therapeutics, Inc. (Nasdaq: VERV) is a clinical-stage genetic medicines company pioneering a new approach to the care of cardiovascular disease, potentially transforming treatment from chronic management to single-course gene editing medicines. The company's initial two programs – VERVE-101 and VERVE-201 – target genes that have been extensively validated as targets for lowering low-density lipoprotein cholesterol (LDL-C), a root cause of cardiovascular disease, in order to durably reduce blood LDL-C levels. VERVE-101 is designed to permanently turn off the *PCSK9* gene in the liver and is being developed initially for heterozygous familial hypercholesterolemia (HeFH) and ultimately to treat atherosclerotic cardiovascular disease (ASCVD) patients not at goal on oral therapy. VERVE-201 is designed to permanently turn off the *ANGPTL3* gene in the liver and is initially being developed in homozygous familial hypercholesterolemia (HoFH) and ultimately to treat patients with ASCVD who have not achieved goal LDL-C with oral therapy and a PCSK9 inhibitor.
